Energy Economics

Index to Volume 9
January, April, July, October 1987

Articles — titles

Economics of nuclear power

Nuclear power and coal-fired CHP. *P. E. Grohnheit* and *P. Laut*. 9.2, 82–92

Electricity supply and demand, pricing

Appliance-specific electricity consumption in Slovene households. *T. Stanovnik*. 9.1, 31–36

The behaviour of publicly owned utilities in wholesale electricity markets: the case of the Pacific Northwest. *L. L. Peters* and *K. P. Seiden*. 9.4, 241–250

Distributional equity and optimal prices for the public sector: the flexible coefficients case. *R. Jha* and *M. N. Murty*. 9.1, 46–54

Electricity equilibrium models with stochastic demands. *N. Levin* and *J. Zahavi*. 9.4, 227–240

Impact of tax reform on renewable energy and cogeneration projects. *E. Kahn* and *C. A. Goldman*. 9.4, 215–226

Multi-product pricing for electric power. *S. S. Oren, S. A. Smith* and *R. B. Wilson*. 9.2, 104–114

Nuclear power and coal-fired CHP. *P. E. Grohnheit* and *P. Laut*. 9.2, 82–92

Energy demand and energy efficiency

Analysis of the factors influencing energy consumption in industry: a revised method. *W. Reitler, M. Rudolph* and *H. Schaefer*. 9.3, 145–148

Changing market opportunities and the structure of R&D investment: the case of energy. *F. R. Lichtenberg*. 9.3, 154–158

The demand for energy: evidence from a cross-country demand system. *D. G. Fiebig, J. Seale* and *H. Theil*. 9.3, 149–153

Energy elasticities under Divisia and Btu aggregation. *H. V. Nguyen*. 9.4, 210–214

Estimates of energy and non-energy elasticities in selected Asian manufacturing sectors: policy implications. *C. M. Siddayao, M. Khaled, J. G. Ranada* and *S. Saicheua*. 9.2, 115–128

Input substitution in Thailand's manufacturing sector: implications for energy policy. *S. Saicheua*. 9.1, 55–63

Residential demand for energy commodities: a household production function approach. *K. D. Willett* and *S. Naghshpour*. 9.4, 251–256

Residential energy demand: an integrated two levels approach. *J.-T. Bernard, M. Lemieux* and *S. Thivierge*. 9.3, 139–144

A simulation model of interfuel substitution in the industrial boiler market. *J. Skea*. 9.1, 17–30

Energy–economy interactions

A cross-sectional analysis of energy–output correlation. *B. W. Ang*. 9.4, 274–286

Energy and economic growth: a case study of Pakistan. *T. Riaz*. 9.3, 195–204

Estimates of energy and non-energy elasticities in selected Asian manufacturing sectors: policy implications. *C. M. Siddayao, M. Khaled, J. G. Ranada* and *S. Saicheua*. 9.2, 115–128

The price of energy and factor substitution in the US economy. *J. V. Greenman* and *L. P. Drollas*. 9.3, 159–166

Energy modelling

Appliance-specific electricity consumption in Slovene households. *T. Stanovnik*. 9.1, 31–36

Changing market opportunities and the structure of R&D investment: the case of energy. *F. R. Lichtenberg*. 9.3, 154–158

A cross-sectional analysis of energy–output correlation. *B. W. Ang*. 9.4, 274–286

The demand for energy: evidence from a cross-country demand system. *D. G. Fiebig, J. Seale* and *H. Theil*. 9.3, 149–153

Economic forces in the European gas market – a 1985 prospective. *J. Boucher* and *Y. Smeers*. 9.1, 2–16

Electricity equilibrium models with stochastic demands. *N. Levin* and *J. Zahavi*. 9.4, 227–240

Energy and economic growth: a case study of Pakistan. *T. Riaz*. 9.3, 195–204

Energy elasticities under Divisia and Btu aggregation. *H. V. Nguyen*. 9.4, 210–214

Exploration for petroleum and the inventory of proven reserves. *S. D. Flåm* and *E. Moxnes*. 9.3, 190–194

Helium conservation: supply and demand projections in the USA reconsidered. *N. D. Uri*. 9.2, 93–98

Inventory theory in cartelized markets. *A. L. Danielsen* and *P. A. Cartwright*. 9.3, 167–175

Multi-product pricing for electric power. *S. S. Oren, S. A. Smith* and *R. B. Wilson*. 9.2, 104–114

The price of energy and factor substitution in the US economy. *J. V. Greenman* and *L. P. Drollas*. 9.3, 159–166

Rate sensitivity and the optimal choice of production capacity of petroleum reservoirs. *A. N. Nystad*. 9.1, 37–45

Residential demand for energy commodities: a household production function approach. *K. D. Willett* and *S. Naghshpour*. 9.4, 251–256

Residential energy demand: an integrated two levels approach. *J.-T. Bernard, M. Lenieux* and *S. Thivierge*. 9.3, 139–144

A simulation model of interfuel substitution in the industrial boiler market. *J. Skea*. 9.1, 17–30

Energy pricing

Continuity and reversal in oil spot price movements. *P.J.W.N. Bird*. 9.2, 73–81

Distributional equity and optimal prices for the public sector: the flexible coefficients case. *R. Jha* and *M. N. Murty*. 9.1, 46–54

Energy prices and investment over the business cycle. *V. Glass* and *E. S. Cahn*. 9.4, 257–264

Multi-product pricing for electric power. *S. S. Oren, S. A. Smith* and *R. B. Wilson*. 9.2, 104–114

Optimal subsidies to new energy sources. *B. D. Solomon* and *T. D. Georgianna*. 9.3, 183–189

Peak-pricing and self-rationing of gas. *C. M. Cannon*. 9.2, 99–103

The price of energy and factor substitution in the US economy. *J. V. Greenman* and *L. P. Drollas*. 9.3, 159–166

Regional energy input prices in Canadian manufacturing: an index number approach. *M. W. L. Chan* and *E. H. Oksanen*. 9.2, 66–72

Exhaustible resource economics

Rate sensitivity and the optimal choice of production capacity of petroleum reservoirs. *A. N. Nystad*. 9.1, 37–45

Oil and gas supply and demand

Continuity and reversal in oil spot price movements. *P. J. W. N. Bird*. 9.2, 73–81

Economic forces in the European gas market – a 1985 prospective. *J. Boucher* and *Y. Smeers*. 9.1, 2–16

Exploration for petroleum and the inventory of proven reserves. *S. D. Flåm* and *E. Moxnes*. 9.3, 190–194

Helium conservation: supply and demand projections in the USA reconsidered. *N. D. Uri*. 9.2, 93–98

Inventory theory in cartelized markets. *A. L. Danielsen* and *P. A. Cartwright*. 9.3, 167–175

Peak-pricing and self-rationing of gas. *C. M. Cannon*. 9.2, 99–103

A process for decision-making on natural gas: fiscal competitiveness in reservoir development. *P. Fobelli.* 9.4, 265–273
Rate sensitivity and the optimal choice of production capacity of petroleum reservoirs. *A. N. Nystad.* 9.1, 37–45
The social viability of ethanol production in Brazil. *R. Seroa da Motta.* 9.3, 176–182

Rejoinder

The demand for gasoline: a comment on the cross-section analysis by Drollas. J. S. Wabe. 9.4, 287–289
Reply: L. P. Drollas. 9.4, 289–291
